About

Multilingual Product Owner with 10 years of experience in the tech ecosystem, combining a strong engineering foundation with expertise in product strategy. Specialized in driving the Software Development Life Cycle (SDLC), backlog management, and aligning business objectives with technical teams in Agile environments (Scrum/Kanban). Leveraging a specialization in AI and Data to translate complex user needs into high-value digital solutions. EU Citizen, open to relocation (Switzerland, France) or

Work experience

Product Owner/IT Project Manager

From Oct. 2022 to Oct. 2025 Union of Financial Corners Genève, Suisse

- Managed the end-to-end SDLC for digital financial products and cryptocurrency exchange platforms, from business planning to post-launch optimization.
- Owned the product backlog, translated business requirements into clear user stories, and prioritized tasks for distributed engineering teams across Europe and the Americas.
- Integrated SEO requirements and user acquisition strategies into core product development to maximize digital visibility and market impact.
- Facilitated Agile sprints and tracked KPIs, increasing development team velocity by 20%.

AI & Data Product Owner (Fixed-Term)

2025 Security Forces Disciplinary Control System Córdoba, CD, Argentina

- Led the product strategy for a supervised NLP text classification tool to automate the analysis of legal disciplinary files.
- Designed and implemented data anonymization protocols (NER, Pseudonymization) ensuring strict GDPR and FADP legal compliance.
- Explored, cleaned, and visualized complex datasets to transform raw data into actionable decision-support metrics.

Functional Analyst

From Feb. 2019 to Dec. 2022 FlyDevs USA (Remote)

- Translated business needs into functional specifications and clear user stories for development teams.
- Bridged the gap and coordinated cross-functionally between business stakeholders, UI/UX, QA, and engineering teams.
- Drove Agile delivery by facilitating sprint ceremonies and aligning CI/CD pipelines with business goals to streamline release cycles.

QA Lead

From 2017 to 2019 Charly Inc. Canada (Remote)

- Designed and deployed testing strategies (functional, integration, regression) for a distributed QA team.
- Maintained test plans, documentation, and bug tracking reports for multiple concurrent software projects.
- Implemented quality assurance processes that improved the software bug detection rate by 30%.

Python Backend Developer (Odoo)

From Feb. 2015 to Jun. 2016 E-MIPS Buenos Aires, Argentina

- Developed and customized Odoo modules in Python to automate enterprise workflows including CRM, inventory management, and accounting.
- Integrated third-party applications and external REST APIs (ERP systems, payment gateways).
