Nicolas José Luis COZZARIN

Nationality: Italian and Argentine | Based in France | +33 7 52 91 96 33
nicolasjcozzarin@gmail.com | Portfolio: nicolas-cozzarin.github.io | LinkedIn: linkedin.com/in/ncozzarin

Three years coordinating IT products and compliance testing at a Swiss money transfer company. Product owner and developer of an NLP triage system for a public security institution. Now focused on AI governance: EU AI Act compliance, human oversight, bias testing and data protection.

EDUCATION

Universidad Empresarial Siglo 21, Córdoba, Argentina May 2023 to December 2026 (expected)
Bachelor's degree in Artificial Intelligence and Robotics (Licenciatura en Inteligencia Artificial y Robótica)

- Distance learning. Average to date: 8.34/10. Only course left: Seminario Final, 3 August to 5 December 2026.
- Final project: EU AI Act compliance checks for credit scoring models (see Projects).

Hochschule Furtwangen University (HFU), Germany Winter semester 2024/25 and summer semester 2025
Exchange student, Bachelor in Computer Science. Grades on the German scale (1.0 is best).

- Business and policy: Impact of Geoeconomics and Politics on Corporate Strategies; Smart Service Innovation (1.0); Data Science and Machine Learning in Business (1.3).
- AI: Deep Generative Models Project (1.7); Model-based Autonomous Systems (2.0); Introduction to Deep Learning.

Universidad Nacional de La Matanza (UNLaM), Argentina 2015 to 2021
Coursework in Ingeniería en Informática, not completed. Courses later credited toward the Siglo 21 degree.

- Information Security; Information Systems Auditing; General Sociology; Programming Logic; Discrete Mathematics; Algebra; Analysis; Physics; Statistics I and II; Advanced Calculus.

Instituto Técnico Industrial San Judas Tadeo, Argentina 2009 to 2015
Electronics Technician diploma (technical secondary school)

EXPERIENCE

International Council for Animal Welfare (ICAW), France October 2026 to present
Volunteer organiser, then campaign organiser (freelance, full time, from November 2026)

- Coordinates La Voix des Crevettes, the local volunteer group of an ICAW campaign asking a major supermarket chain to adopt shrimp welfare standards.
- Built the campaign's web platform: actions map, newsletter, report and a private space for organisers.

Provincial public security institution, Córdoba, Argentina November 2025 to June 2026
Product Owner and Developer, NLP triage system. Degree internship (Professional Practice course), remote, part time

- Gathered requirements with legal staff for a system that sorts citizen complaints about police misconduct into the office's 8 official categories.
- Designed human oversight: a prosecutor approves or changes every suggestion, with role-based access and an audit log of each decision.
- Removed names, ID numbers and addresses before any person or model reads a complaint, in line with Argentine data protection law (Law 25.326). All data stays on government hardware.
- Fine-tuned BETO (Spanish BERT) after TF-IDF baselines. On a blind test set of 2,189 complaints: 77% recall on institutional violence, F1 of 0.72 on gender-based violence.
- Graded 10/10 on 3 July 2026.

Union of Financial Corners SA, Geneva, Switzerland October 2022 to October 2025
IT Technician (technicien en informatique): product and project coordination
Money transfer and currency exchange company with its own branches and franchised outlets across Switzerland, subject to Swiss anti-money-laundering rules. Full time on site in Geneva; part time and remote during the HFU exchange.

- Led the launch of crypto buying and selling at the counter, with ID checks, KYC by amount, amount limits and records kept for audits. Live in the Geneva, Lausanne, Bern and Zurich branches.
- Ran quality and compliance tests on new products and processes against anti-money-laundering and operational rules before launch.
- Acted as product owner for an online currency exchange platform and an improved Western Union money transfer flow.
- Coordinated about 10 developers and suppliers. Wrote user stories and acceptance criteria; trained staff.

FlyDevs, USA (remote) January 2020 to September 2022
Functional Analyst (freelance)
- Turned business requirements into functional specifications and user stories; ran the Agile ceremonies.

Charly Inc., Canada (remote) March 2017 to December 2019
Lead QA Analyst
- Defined functional, integration and regression test strategies and coordinated a distributed QA team.

E-MIPS, Buenos Aires, Argentina February 2016 to January 2017
Python Backend Developer (Odoo)
- Developed Odoo modules in Python (CRM, inventory, accounting) and connected them to payment gateways.

PROJECTS

EU AI Act checks in the deployment pipeline 2026
Final project, Universidad Empresarial Siglo 21. Modelled case: the bank and the consultancy are fictional.
- Turns five EU AI Act obligations into automatic checks for each new version of a credit scoring model: risk category, documentation, logging, human oversight and sex bias.
- Blocks deployment when a check fails. The report gives the rule, the observed and expected values, and the article (Art. 6, 10, 11, 12 and 14).
- First run: version 1 passed all five checks. Version 2 was blocked by the bias rule (demographic parity difference of 0.15; the project's limit is 0.10).
- Built with RDF model cards and SHACL rules on GraphDB, Fairlearn for the bias measure, Streamlit screens and Docker. Designed to run as a GitLab CI step.

Justice Inequality Simulator 2025
Deep Generative Models Project, HFU
- Tests whether a model that predicts US Supreme Court outcomes is biased: it changes one sensitive word in the case facts and measures how much the prediction moves.
- In several cases one word swap moved the predicted probability by 0.10 to 0.25. Built with Legal-BERT and PyTorch. The write-up explains the limits of the evaluation.

VOLUNTEERING

AI Enabler, Hack the Fork, Paris, France 2026
- Designed the AI framework for this alternative protein hackathon. Mentored teams on scoping AI projects.

Logistics, Vegan Campout Argentina, Buenos Aires, Argentina 2021 to 2022
- Coordinated stall logistics and suppliers for an event with 2,000 attendees. Led 20 volunteers on the day.

COURSES

Future of AI, BlueDot Impact	August 2026
AI×Animals Fellowship, Sentient Futures	in progress, ends December 2026
Fundamentals of Agents (Agents Course, Unit 1), Hugging Face	September 2026
Anti-money-laundering (AML) training, Union of Financial Corners	October 2022
Introductory workshops on effective altruism, Altruisme Efficace France	June to July 2026

LANGUAGES

Spanish: native | **English:** Duolingo English Test 140/160 (8 October 2026) | **French:** fluent (self-assessed)
German: B2, HFU course passed with 2.3 (summer semester 2025) | **Chinese:** basic, about HSK 3 level (not certified)

SKILLS

AI governance: EU AI Act (risk category, technical documentation, logging, human oversight), data protection by design (Argentine Law 25.326), anonymisation, bias testing, audit logging, anti-money-laundering compliance
Product: requirements with legal and business staff, specifications, user stories, Scrum and Kanban, supplier coordination, staff training
Technical: Python, PyTorch, Hugging Face Transformers, scikit-learn, spaCy, Microsoft Presidio, Fairlearn, RDF, SHACL, SQL, Docker, Git, CI/CD
